

To whom it may concern,

This is not my usual cover letter as I am nowhere close to the "required years of experience". So I will keep it short for both you and me.

I am not looking to fill this position but to seek opportunities in a junior/entry level position or an internship. I have no doubt that Asurion has a constant load of work that needs to be done and I have no doubt that the company will continually seek for talent and that's why I am submitting myself.

What I can tell you about myself other than the facts listed on my resume is that I will be a great asset if hired. I have proved my ability to adapt to new situations and my fast ability to pick up materials that I am not familiar with which can be validated by my previous project manager and the vice president. I believe they will speak better for me than what I can fit in this page. Should you be interested in having a conversation with either me or my references, please feel free to contact me.

I look forward to chatting with you.
